SWISS MADE

PREMIUM SKI AND SNOWBOARDS

# 100% SWISS MADE

## MANUFACTURE

Every ski and snowboard is designed, developed and produced in Schwanden in the Canton of Glarus. Precise handiwork and a love for detail guarantee that our products are of the highest quality possible.

From the first blueprints to the well-engineered end products, our skis and snowboards go through elaborate development and production processes. Swiss craftsmanship paired with

modern technology ensure that our products meet the highest quality and performance standards.

The results are perfectly handcrafted products - Made in Switzerland.

«With a great love for detail,  
we produce quality Swiss-made skis and  
snowboards of the highest value.»

«Modern production technology, as well as nearby test routes, form the backbone of our well-engineered and high-quality products.»

## PRODUCTION SITE IN SWITZERLAND

By manufacturing our products exclusively in Switzerland, we deliberately set up a countertrend in the ski industry. This has significant advantages in many respects. Thanks to the local infrastructure, new ideas and feedback from nearby test routes can directly influence our products. By controlling every production process, we can ensure that innovative developments are integrated into our products to ensure their high quality and performance.

# TECHNOLOGY

## TIMELESS DESIGN

We demand the highest quality from our raw materials and handle them with passion and precision. Beneath the timeless and spatially optimized surface of our products are only premium materials.

The exquisite wood at the core is still the best recipe against unwanted vibration and for high performance. Depending on the area of application, the selected sidewall materials ensure maximum ice grip. Every component of Kessler products deserves the «Premium» seal according to our credo: «Pure Exterior, Maximum Power Interior.»

## PURE EXTERNAL AESTHETICS...

# ...MAXIMIZED INTERNAL PERFORMANCE

## PATENTED TECHNOLOGY

KST (Klothoid Shape Technology) is the patented technology used in all of our products. This type of construction was originally developed for snowboard racing and was successfully adopted for the manufacture of skis. With KST, different radii, which are achieved depending on the angle of the skis, define the driving line. As a result, the ski is more versatile. Small, tight curves, as well as wide curves, are possible with the same ski.

The original construction has been constantly perfected during the last 20 years thanks to the close collaboration with Olympians and world champions. This experience can be felt in every product and is revealed through the high performance and easy handling of every one of our skis and snowboards.

Patent CH697123

«The secret of KST is the dynamic interplay between the baseline and the sidecut.»

# BOARDS

PERFORMANCE, QUALITY AND  
SWISS CRAFTSMANSHIP

## RACE/SLALOM

# THE ALPINE WC Worldcup

With the new ALPINE Worldcup, Kessler has developed a snowboard that is optimally adapted to the new conditions in racing. The consistent application of the Kessler Shape Technology gives the rider full control over the board as usual. With the newly developed Torsion Power Control System (TPCS), even more energy can be stored in the swing, which then dynamically supports the swing change. The adapted geometry allows maximum speed at the exit of the turn. Success is pre-programmed.

### FEATURES

- patented Kessler Shape Technology
- Clothoid Sidecut
- Sandwich Titanal Construction

## RACE/SLALOM

# THE ALPINE

No other board has won more medals or titles at international events than THE ALPINE. Snowboarding professionals around the world highly rate the steady edge grip and the control provided in all conditions due to the Kessler Shape Technology. THE ALPINE provides easy handling when competing and racing, as well as during freestyle carving on icy terrain. Feel at ease from the very first turn, no matter what level you are at. Ambitious carvers love the THE ALPINE!

## BOARDER X

### X-CARVE

X-CARVE, the new board from Kessler's range of snowboards, provides for even faster and more precise carving. The proven construction of Kessler snowboards with multiple titanium layers ensures that the board rides smoothly and has torsional stiffness. A progressively decreasing sidecut in the tail area paired with the modern design at the front raises the carving experience to a new level. The board's width and 6x2 inserts give you increased flexibility to achieve your optimal binding setting.

## BOARDER X

# THE CROSS

It is amazing how easy carving can be with a soft boot and surprising how smoothly THE CROSS handles in all types of conditions. THE CROSS is the ultimate all-round board concept from the Kessler snowboard range and has made its mark in the world of snowboarding! Gold medals at Winter Olympic Games and at World Championships were won with THE CROSS in Boarder-X.

## THE CROSS light

Lighter build, easier to control, easier to ride. For light riders who don't want weak boards, but demand as much bite and the same performance as the heavy hitters. THE CROSS LIGHT combines the uncompromising champion properties of THE CROSS with additional effortless control and the best handling. For sheer driving pleasure at the highest level.

## ALL MOUNTAIN

# SPECTRA

Are you ready for freshly snow-covered powdered slopes or hard pistes? With the new SPETRA, come what may. The board's uncompromising power ensures a breathtaking performance for every snow condition. The slightly softer core provides for a more playful nature, without losing edge grip or torsional strength.

The additional use of carbon layers provides plenty of pop and an extremely fast response time of the board.

No matter what comes your way, you're ready with the new SPECTRA.

## SNOWBOARD BINDINGS, PLATES AND COVERS

### K.TECH ALPINE TI

The high-end plate binding for racers and extreme carvers. Improved power transmission and flex performance due to new bail geometry.

- 3 sizes for perfect flex performance
- Quick and direct power transmission
- Anodized Titanium coating for excellent looks and corrosion resistance
- Stiff side flex especially for very narrow boards and steep binding angles
- EDS-shock absorption system for full control
- Extremely stable due to extra thick 5.9 mm stainless steel bails

Size	S: 21.5 – 26.5	M: 24.5 – 27.5	L: 26.5 – 31.0
Art.-No.	KS91.010		

### ROCKET CROSS

The K. Plate Rocket Cross has been designed to meet the highest demands of Boarder-Cross-Riders. Due to the increased elevation, the board can now get even more edge without the boot or binding touching the snow. The sleek form of the binding plate guarantees an equal application of pressure on the board whilst increasing the grip of the edges and improving riding stability.

The K. Plate Rocket Cross can be customised to the width of the board, and can be easily mounted on your own.

Length: 310 mm  
Weight incl. screws: 1200 g  
Adjustable width: 230, 242, 252 mm

Art.-No.	KS91.032
----------	----------

### Boardcover SL/GS

Size	M: 150–169	L: 170–186
Art.-No.	KS93.080	

### Boardcover Cross

Hansjürg Kessler

## PHILOSOPHY

«High performance-easy handling» is guaranteed in the premium products from Kessler-Swiss. Behind our meaningful mission statement lies more than simply an intention. Instead, it defines the philosophy of the world of Kessler.

Every ski and snowboard is designed and produced with passion and know-how in Schwannden in the Canton of Glarus.

«High performance-easy handling» are not empty words. Our goal is to provide Swiss-made skis and snowboards that have the highest performance and easy handling to every rider and for every riding level.
